

Sprint 2 Plan “DeliverMe”

Jeffrey Chan (PO)
Avery Sio (Scrum Master)
Daniel Tjandra
Brian Wan
Hasaan Javed
Justin Lau

Sprint completion date: Feb 18, 2018

Revision date: Feb 5, 2018

Goal: To implement a “transactions page” that consist of real time updates conveying locations of requesters and drivers.

Sprint 2:

1. (8) As a non-regular user, I want to be able to see real-time updates around me so that I can find the right “partner” for my request quickly and easily.
 - a. Task 1: Implement HTML/CSS website skeleton
 - b. Task 2: Learn about Google API map
2. (8) As a user, I want to be able to login and access my account to set up my profile so that I can more easily communicate with my “partner.”
 - a. Task 1: Learn about Google API login
 - b. Task 2: Learn about storing data into a database

Team Roles:

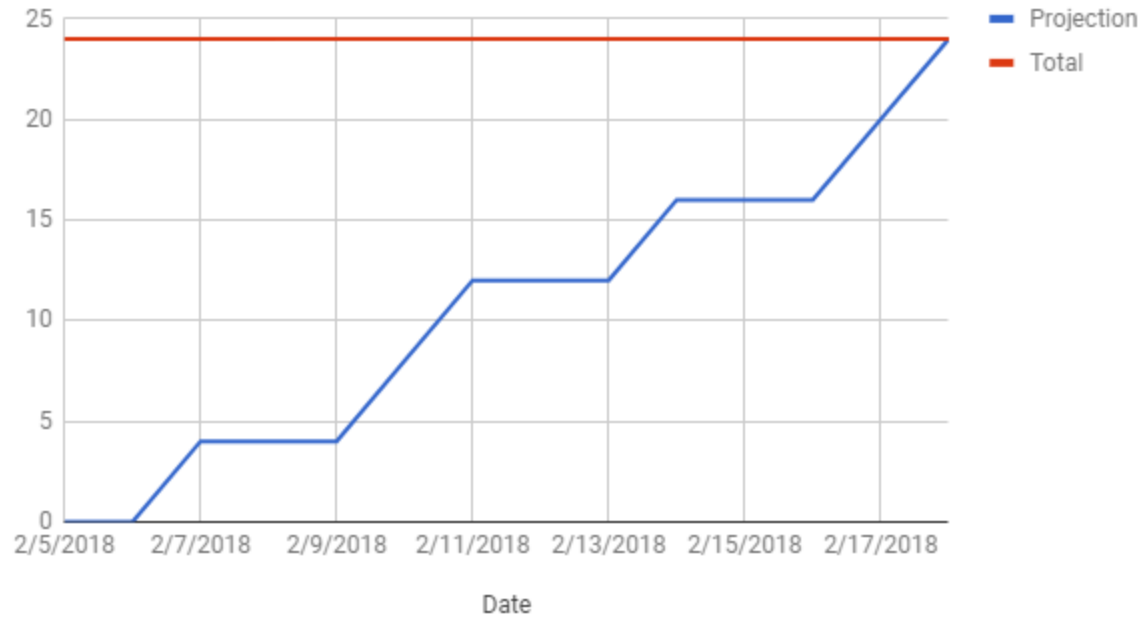

Jeffrey Chan - Product Owner, Backend
